

CAROLIN BANKS

SOFTWARE DEVELOPER

PERSONAL PROFILE

I am a software engineer, and I want to work on full time roles associated with Machine Learning. I have previously worked on some corporate models and due to its intricacies I want to explore more in the domain.

SKILLS

C++, Python, Firebase, Flutter, Tensorflow, Pandas, Numpy, Kotlin, Java, MongoDB, NoSQL.

PROJECTS

Face Recognition system

WORK BACKGROUND

XcelSior

SDE , May 2019 - Till date

Used unsupervised learning algorithms like DBSCAN to identify new identities in the system. This was used to increase the number of identities in the Face recognition pipeline. Enhanced this setup by implementing the K-Means algorithm as well.

EDUCATION

B.Tech (Computers) from National Institute of Technology (NIT), Hamirpur in 2020

OTHER ACTIVITIES

B.Tech(Metallurgy) CIT, Calicut, 2019
